---	--

The TGM Group is a multi-disciplinary engineering; surveying and town planning consultancy practice, servicing a wide range of clients from our offices in Melbourne, Geelong, Ballarat and Ballina. We are currently seeking applications from suitably qualified Structural Engineers to join our structural engineering design consultancy teams in our Melbourne or Geelong offices.

Our consultancy teams comprised an energetic and dynamic group young and experienced professionals that work collectively to achieve great outcomes for their clients. If you are enthusiastic, ambitious, looking for a work environment that challenges and grows your professional skills, then TGM may be the place for you.

These roles require the skills and experience that will contribute to our structural engineering consultancy teams, ensuring quality standards and delivery timelines are achieved.

### Essential requirements

To be successful in these roles, you will have the relevant qualifications (degree) and at least 5 to 10 years structural engineering experience in the following areas;

- Commercial and Industrial projects
- Infrastructure projects including, bridges (road and pedestrian), boardwalks, retaining walls (and similar structures) drainage and sewer pit designs
- Residential structural design for project that ranging from \$0.5m to \$3m
- Experience with structural design software such as Space Gass, REVIT, RAPT, MicroStran, etc
- Some exposure or experience in building and construction supervision.

### Personal/Professional attributes

- A self- starter with the ability to manage multiple complex projects with competing demands/priorities
- Establishing client needs, documenting their requirements/expectations
- A flexible approach that caters for changing priorities or demands
- The ability to take projects from initial concept stage through to final documentation
- A focused approached to the task, with an ability to complete set tasks within defined time limits and work co-operatively in a team environment
- Established interpersonal skills and the ability to work within an established team of engineers and drafting personnel
- Attention to detail, a commitment to quality outcomes for clients
- Advanced communication skills (written & verbal)
- Excellent client relation and customer service skills
- Willingness to travel and work in different locations
- Staff management and administrative skills

### **Salary;**

- TGM provides a competitive remuneration structure that rewards effort and output. The salaries for these roles will be governed by the skills, competencies and experience the individual can bring to the role.
